

Naresh Suwal

Baton Rouge, LA | (225) 477-4087 | nsuwall@lsu.edu (U.S. Lawful Permanent Resident)

<https://www.linkedin.com/in/naresh-suwal-9a49a1ab/>

Education

Louisiana State University (LSU), Baton Rouge, LA

May 2026

Ph.D., Civil and Environmental Engineering GPA: 4.00.

Related Coursework: Groundwater Management Modeling, Physical Hydrology, Advanced Environmental Hydraulics, Eco-geomorphic Modeling, Advanced GIS, Satellite Oceanography

Hohai University, Nanjing, China

June 2019

Master of Engineering, Water Resources Engineering, 89.36%

Related Courses: Sediment Processes, water resources planning and management, modern hydrological modeling and forecasting, GIS and Spatial Analysis

Institute of Engineering, Tribhuvan University, Nepal

Dec 2014

Bachelor of Engineering, Agriculture Engineering (Bachelor), 79.23%

Experience

Instructor – Fluid Mechanics (CE 2250)

Jan 2024 - May 2026

Louisiana State University (LSU), Baton Rouge, LA

- Facilitated hydraulic experiments and guided data analysis for undergraduate students.
- Assessed laboratory reports and provided constructive feedback on comprehension and accuracy.

Lecturer

Aug 2019 - July 2022

Khwopa College of Engineering, Bhaktapur, Nepal

- Taught courses in Hydrology, Hydropower Engineering, and Irrigation and Drainage Engineering.
- Guided students through design projects focused on hydraulic components.
- Mentored students in practical applications of engineering concepts.

Water Resources Engineer

Aug 2019 - July 2021

Mannings Consult Pvt. Ltd, Lalitpur, Nepal

- Applied HEC-RAS and HEC-HMS to conduct rainfall runoff simulation, flood inundation mapping, and river hydraulics studies for client projects.
- Performed data processing, visualization, and statistical analysis using R, ArcGIS, and QGIS to support environmental and hydrological assessments.
- Collected, reviewed, and compiled secondary datasets, including satellite imagery, aerial photographs, and GIS-based spatial data, to support research projects and database development.
- Led field survey teams conduct irrigation canal inventory, assessment, and improvement planning.

Site Engineer

Jan 2015 - Aug 2016

SHELADIA-MULTI J/V, Mahakali Irrigation System, Nepal

- Supervised construction of irrigation infrastructure, ensuring adherence to design specifications.
- Conducted field inspections of hydraulic structures to assess quality and compliance.
- Coordinated with contractors to align project execution with design requirements.
- Facilitated training sessions for local farmers to enhance operational skills and agricultural practices.

Skills and Expertise

- Hydrologic & Hydraulic Modeling: HEC-HMS, HEC-RAS, SWMM, SWAT, Delft3D.
- Groundwater: MODFLOW.
- Stormwater & Watershed Analysis: Runoff modeling, flood risk analysis, watershed modeling, reservoir optimization.
- GIS & Geospatial Analysis: ArcGIS Pro, SeaDAS, AutoCAD Civil 3D.
- Programming & Data Analysis: Python, MATLAB, HPC, Scikit-learn, TensorFlow, Keras, NumPy, Pandas, Matplotlib.
- Productivity and Collaboration: Microsoft Office (Word, Excel, PowerPoint, Outlook), Teams, Zoom, Box.

Professional Training and Membership

- Total Maximum Daily Loads (TMDL) & Holistic Watershed Management (2.0 PDH), American Society of Civil Engineers — March 2026.
- USGS Google Earth Engine, March 19, 2026, USGS Surface Water Procedures and Policies, March 2026.
- Big Data Analysis for Water-Related Applications (18 hours), United Nations University, April 2026.
- Member of American Society of Civil Engineers and International Water Resource Association.

Volunteer Service

- Hohai University Internation Office, Nanjing, China (June 2017 – July 2017).
- Judge, Louisiana Science and Engineering Fair, 2026
- Judge, LSU Discover Day, 2026
- Treasurer, Nepal Agricultural Engineering Society (NAES), 2013
